

# Scalewatcher Report

Roundabout 1 – Diplomatic Quarter  
Al-Riyadh, Kingdom of Saudi Arabia

(SSMECHA) Saudi Specialised Mechanisms , LLC

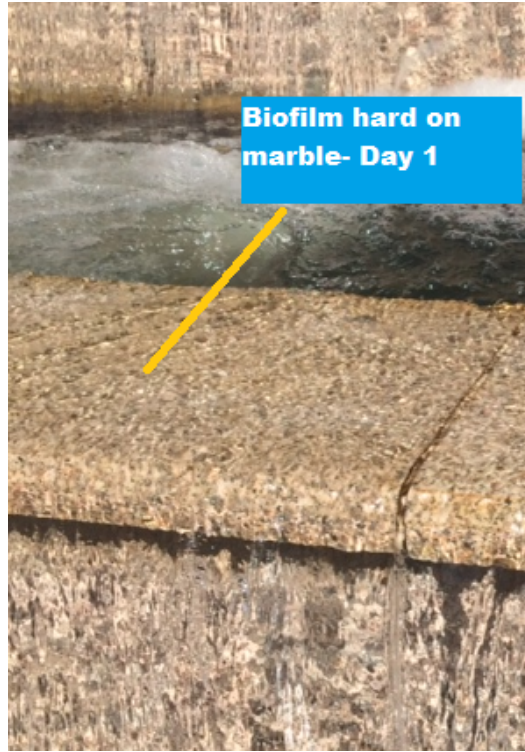

Placement of device- 15/1/2015

Water Tested –

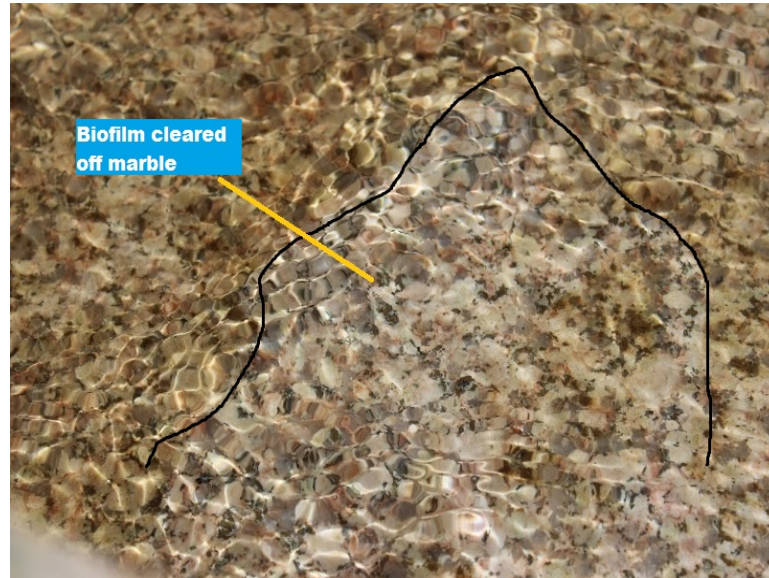

High levels of algae and biofilm bacteria in the water

High level of PH 7.9

After 1 month results

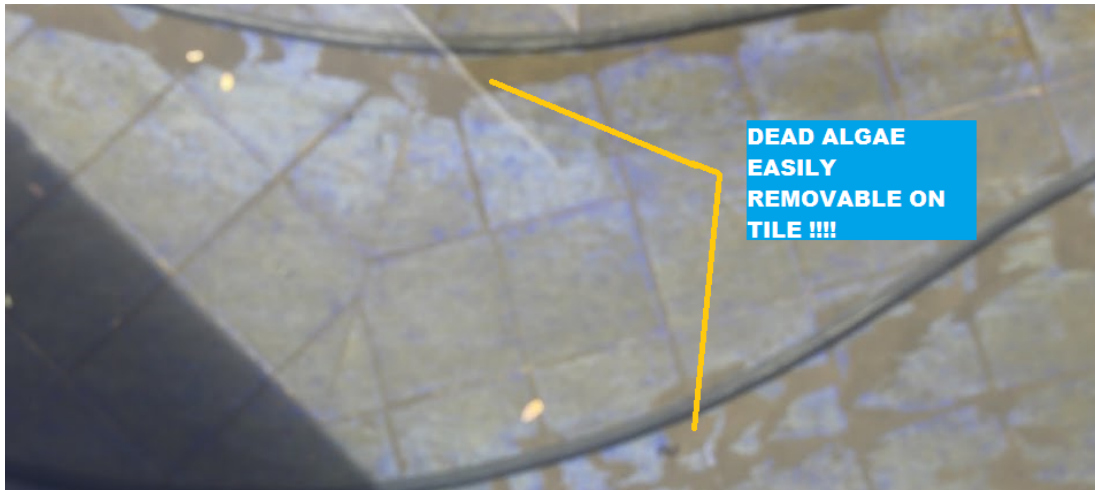

## 1 MONTH RESULTS

Scalewatcher KILLS ALGAE and REMOVES RUST

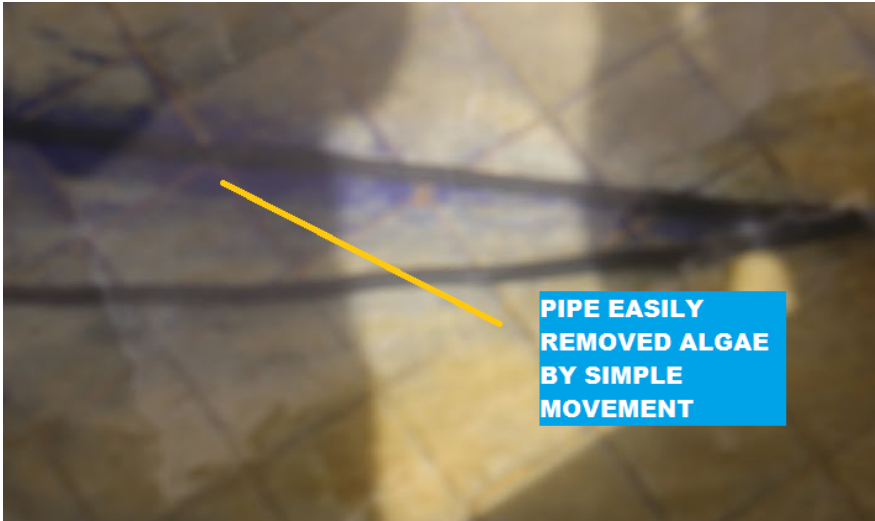

Small Algae particles need a better medium for filter

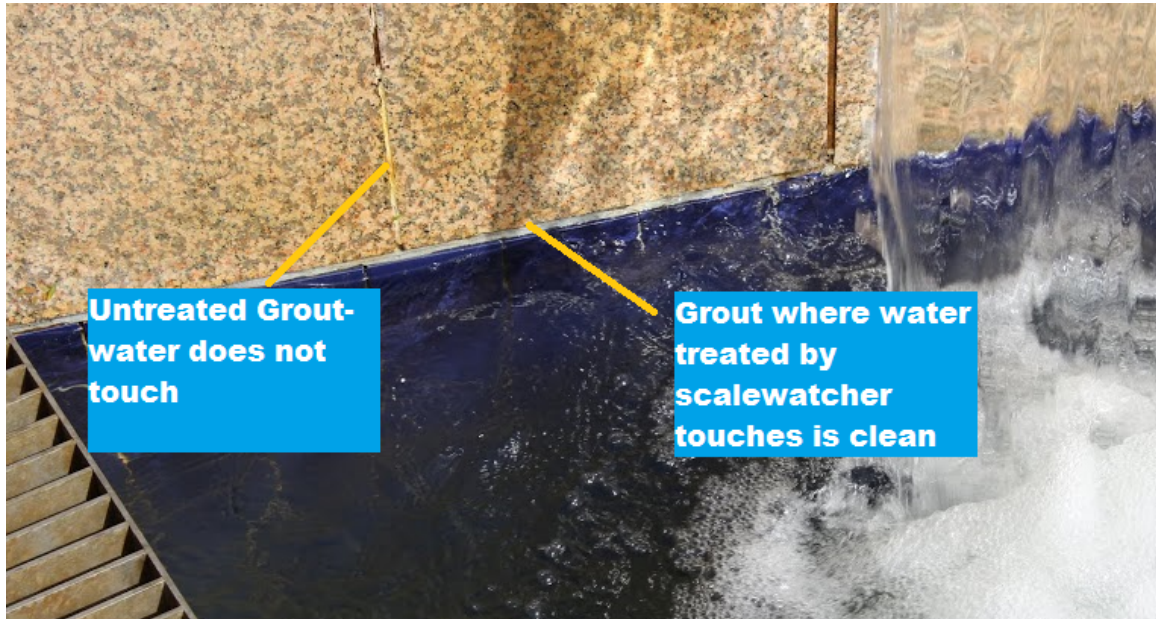

**Highly recommend installation  
Of Glass medium for your filter  
instead of sand**

- SCALEWATCHER was used only 6 hours a day
- Recommendation is 8 hours a day minimum
- Also Recommendation to Change the media of filter from SAND to GLASS MEDIA

PH reading after 1 month is 7.0

Means environment for algae living is GONE means ALL ALGAE WILL DIE
